# simplicity re-engineered with you in mind...

When redeveloping the control box that operates over 500,000 rollerbed systems around the world, it was important to balance intricate pneumatic engineering with simplistic design principles.

Introducing the...  
New Pneumatic Control Box

# benefits

**Laser-Engraved Lid**

No more peeled lacquer or paint

**Fully Removable Inners**

The entire internal assembly can be simply removed

**Compact Inner Design**

Easy access to valve and airline service and maintenance work

**External Airline Connections**

For quick and easy connection/disconnection

**External Dimensions Remain**

Easily interchangeable for replacement purposes

**Push/Pull Valves**

Easily operatable with a failsafe deflation, should AutoDown be utilised

**AutoDown Reset**

Automatic valve reset when AutoDown is utilised

**Improved Labelling**

Easier system operation for those unfamiliar

**Strong Magnetic Lid**

Ensuring the lid is always properly closed during transit

**Adjustable Pressure Regulator**

Manually increase or decrease rollertrack PSI for optimal performance
